

HASNAT SHABBIR

+447555857820 | hasnat5124@gmail.com | London, UK

Summary

Results-driven **Software Engineer** with **5 years of hands-on experience**, including almost **2 year in the UK**, specializing in **JavaScript technologies** such as **React, Next.js, Node.js, Express, and React Native**. Skilled in building **scalable, high-performance web and mobile applications** using modern frameworks, **AWS cloud services**, and **containerized architectures** with Docker. Passionate about writing **clean, maintainable code**, solving complex technical problems, and delivering reliable, user-focused solutions. Seeking a **full-time role** within an innovative team where I can contribute technical expertise and continue to grow in a dynamic environment.

Work Authorization: Full right to work in the UK (Graduate Visa – valid until **Feb-2028**, no sponsorship required)

Skills

Technical Skills

Frontend Development: React , React Native, Next.js, JavaScript (ES6+), Typescript , HTML5, CSS, Redux, Bootstrap

Backend Development:

Node.js, Express.js, NestJS, RESTful & GraphQL APIs, TypeScript, Socket.io, JWT/OAuth 2.0 Authentication, Microservices & Event-Driven Architecture, Redis Caching, Job Scheduling, Serverless & Scalable System Design

Database Technologies:

MongoDB, SQL, PostgreSQL, Mongoose, Sequelize

Cloud & DevOps:

AWS (Elastic Beanstalk, EC2, S3, Lambda, Route 53), Docker, Docker Compose, AWS CodePipeline, CI/CD Pipelines, and Serverless Deployments

Others:

API Integration, WebSockets, Cross-Platform Mobile Development, API Documentation (Swagger / OpenAPI), Git Version Control, Debugging & Troubleshooting, and Continuous Deployment Practices

Soft Skills

- Problem Solving & Analytical Thinking
- Effective Communication
- Team Collaboration & Agile Workflow
- Time Management & Task Prioritization
- Adaptability in Fast-paced Environments
- Attention to Detail
- Ownership & Accountability
- Self-motivated & Continuous Learner

Experience

CabDespatch LTD | Kent, England

Software Engineer | 08/2024 - Present

- Developed and maintained **SaaS-based ride booking applications** for taxi operators using **React Native, React.js, .NET** backend APIs, and **SQL Server** databases.
- Built and supported **customer and driver mobile apps**, web dashboards for operators, and robust backend systems for ride dispatch and booking.
- Implemented **multi-tenant architecture** with **zone-based access** to serve different clients through a single SaaS platform.
- Managed **Docker containerization, CI/CD pipelines**, and **domain configurations** for seamless deployment and updates.
- Deployed backend and frontend services to the cloud using **AWS Elastic Beanstalk**, with automated build and release workflows.
- Ensured system reliability and scalability through effective cloud infrastructure management and monitoring.
- Collaborated cross-functionally to plan, develop, and maintain production-grade features with a focus on **performance, maintainability, and user experience**.

Fabulous Technology Solutions | Sialkot, Pakistan
Software Engineer | 02/2022 - 08/2024

- **Worked as a Full-Stack Developer**, gaining hands-on experience in both frontend and backend development.
- Developed expertise in **advanced backend optimization**, focusing on query performance, security best practices, and scalable API design.
- Prioritized writing **clean, reusable code**, enhancing maintainability for future projects.
- Began exploring **DevOps**, managing full-stack application deployments on **AWS using Docker**.
- Took on **DevOps responsibilities**, successfully deploying applications on **Elastic Beanstalk and Amplify**.
- **Designed reusable software components**, reducing development effort by **50% across multiple projects**.
- Consistently recognized for **top performance**, achieving the highest rating in the past year.
- **Promoted to Team Lead in 2024**, overseeing a team of **10 developers** and driving project success.

Logics Yard | Lahore, Pakistan
Associate Software Engineer | 07/2021 - 02/2022

- Started by developing **front-end components** using **HTML, CSS, and JavaScript**.
- Built **responsive and dynamic web pages** using **React**, enhancing user experience.
- Assisted in **backend development** with **Node.js and Express.js**, implementing server-side logic.
- Collaborated with the team to **debug and troubleshoot** issues across the stack, ensuring seamless functionality.
- Integrated **RESTful APIs** to establish efficient communication between front-end and backend services.
- Actively participated in **code reviews**, maintaining high code quality and adherence to best practices.

Education

University of Hertfordshire | Hatfield, England
MS Advance Computer Science | 09/2025

University of Sialkot | Sialkot
BS Software Engineering | 08/2022

Projects

Topics Chat – Social Media & Communication Platform | 11/2023 – 08/2024

- Architected and developed the foundational codebase for **Topics Chat**, a €1M-funded social media startup backed by high-profile Portuguese athletes and public figures.
- Built scalable real-time communication features including **1-to-1 messaging, group chats, community messaging, multimedia sharing, and push notifications**.
- Integrated **Agora SDK** to support high-quality audio and video calling, including early monetization logic for premium celebrity interactions.
- Developed core platform features such as **background location tracking, personalised home feed logic, and a custom username marketplace**.
- Contributed to the early-stage technical architecture, helping establish a scalable foundation for product growth.
- **Link:** www.topicschat.com

GPHTEST/ Glacier Peak Holistics Test Platform – Full-Stack Web Application

- Led development of a production pet intolerance testing platform used to manage **50k+ test workflows**, including registrations, barcode operations, sample tracking, technician reports, and customer result delivery.
- Built multi-role dashboards for **admins, sub-admins, technicians, and customers**, supporting barcode generation, activation, report submission, report regeneration, flagged customer reviews, and operational analytics.
- Engineered automated report generation workflows with **intolerance scoring, product recommendation logic, energetic imbalance data, PDF delivery, and exportable barcode/report data**.
- Developed analytics dashboards covering registration trends, sample/report pipeline status, barcode activation, geographic distribution, duplicate clients, pet demographics, recommendation trends, and report insights.
- Helped automate business-critical operations for a high-volume commercial testing platform, contributing to significant revenue impact and reduced manual processing.
- **Tech Stack:** React, Material UI, Node.js, Express.js, MongoDB, Mongoose, PDF generation, CSV/PDF exports, role-based authentication, analytics aggregation, cloud deployment.

CareFeedback – Web & Mobile Feedback Platform

- Developed an intelligent feedback collection system using **geofencing technology** to automatically detect when users enter or exit client office locations.
- Built automated feedback prompts triggered by location activity, improving the accuracy and timing of customer feedback collection.
- Created real-time analytics dashboards to help clients monitor feedback trends and generate actionable insights.
- Implemented location-based automation workflows to reduce manual data collection and improve operational visibility.

Healthhop – Full-Stack Medical Platform

- Developed a multi-role healthcare platform supporting **medical providers, patients, and admins** through dedicated web dashboards.
- Integrated **Stripe payments and escrow transaction workflows** for secure medical procedure payments.
- Implemented real-time communication features using **Socket.io**, including notifications and messaging across email, phone, and WhatsApp workflows.
- Built React-based dashboards while supporting integration with the main WordPress website.
- Configured multi-domain forwarding and deployment workflows using **AWS and GoDaddy**.
- **Live Demo:** healthhop.com, app-dev.healthhop.com
