

HASNAT SHABBIR

+447555857820 | hasnat5124@gmail.com | London, UK

Summary

Software Engineer with **5 years of hands-on experience**, including **almost 2 years in the UK**, building production web, mobile, backend, and cloud systems using **React, Next.js, Node.js, Express.js, NestJS, React Native, .NET backend APIs, SQL Server, AWS, and Docker**. Experienced across SaaS taxi dispatch platforms, real-time communication, dashboards, mobile apps, API integrations, SQL/NoSQL databases, CI/CD, Windows Server/IIS deployment support, and production troubleshooting. Known for clean, maintainable code, ownership, and reliable delivery across modern and legacy systems.

Work Authorization: Full right to work in the UK (Graduate Visa valid until Feb-2028, no sponsorship required)

Skills

Frontend: React, Next.js, JavaScript, TypeScript, Redux, HTML5, CSS, Bootstrap, responsive UI, dashboards

Backend: Node.js, Express.js, NestJS, .NET backend APIs, REST APIs, GraphQL APIs, authentication, role-based access

Mobile: React Native, driver/customer apps, mobile API integration, push notifications, location-aware workflows

Databases: SQL Server, MongoDB, PostgreSQL, SQL, Mongoose, Sequelize, LINQ query work

Cloud & DevOps: AWS Elastic Beanstalk, EC2, S3, Lambda, Route 53, Docker, Docker Compose, CI/CD, AWS CodePipeline, Windows Server/IIS deployment support

Real-Time & Integration: Socket.io, WebSockets, SignalR, API integrations, Swagger/OpenAPI, payment workflows, domain configuration

Experience

CabDespatch LTD | Kent, England

Software Engineer | 08/2024 - Present

- Develop and maintain SaaS taxi booking and dispatch systems using React Native mobile apps, React web dashboards, .NET backend APIs, SQL Server-backed workflows, and cloud deployment pipelines.
- Support legacy .NET backend projects and newer platform features, including booking workflows, dispatch logic, operator configuration, API integrations, and SQL Server data access.
- Work on LINQ query logic, database-backed workflows, and production troubleshooting for ride booking, customer, driver, and operator journeys.
- Implement and support real-time taxi system updates using SignalR/socket-based messaging for ride status, dispatch coordination, and operational visibility.
- Manage AWS Elastic Beanstalk, Docker, CI/CD, domain configuration, and Microsoft server deployment support for backend and frontend services.
- Contribute to multi-tenant SaaS architecture with client-specific configuration, zone-based access, and maintainable production release workflows.

Fabulous Technology Solutions | Sialkot, Pakistan

Software Engineer | 02/2022 - 08/2024

- Built full-stack web and mobile features using React, Next.js, React Native, Node.js, Express.js, JavaScript, TypeScript, MongoDB, PostgreSQL, AWS, and Docker.
- Developed backend services, API integrations, authentication flows, dashboard features, and database-driven workflows for production applications.
- Improved backend performance through query optimization, scalable API design, and cleaner service structure while keeping frontend features maintainable.
- Designed reusable components and backend patterns that reduced development effort by 50% across multiple projects.
- Promoted to Team Lead in 2024, supporting a team of 10 developers and driving delivery, code quality, and project execution.

Logics Yard | Lahore, Pakistan

Associate Software Engineer | 07/2021 - 02/2022

- Developed responsive web components using HTML, CSS, JavaScript, and React.
- Assisted with Node.js and Express.js backend functionality, server-side logic, and REST API integration.
- Collaborated on debugging, troubleshooting, and code reviews to improve reliability across frontend and backend layers.

Projects

GPHTEST / Glacier Peak Holistics Test Platform | Full-Stack Operations Platform

- Led development of a production testing platform used to manage 50k+ workflows across registrations, barcode operations, sample tracking, technician reports, and customer result delivery.
- Built multi-role dashboards, backend workflows, PDF/report generation, barcode exports, role-based access, analytics aggregation, and operational reporting.
- Delivered React interfaces and Node.js/Express/MongoDB services that automated high-volume business processes and reduced manual handling.

Topics Chat | Social Media & Real-Time Communication Platform

- Built scalable real-time communication features including 1-to-1 chat, group conversations, community messaging, multimedia sharing, push notifications, and Agora audio/video calling support.
- Contributed to personalised feed behavior, background location functionality, username marketplace flows, and early-stage scalable product architecture.

Healthhop | Full-Stack Medical Platform

- Developed a multi-role healthcare platform supporting providers, patients, and administrators through dashboards, payment workflows, and real-time communication.
- Integrated Stripe payments and escrow workflows, Socket.io notifications, API-connected dashboards, and deployment/domain configuration using AWS and GoDaddy.

CareFeedback | Web & Mobile Feedback Platform

- Developed geofencing-based feedback workflows, automated location-triggered prompts, and real-time analytics dashboards for operational insight.

Education

University of Hertfordshire | Hatfield, England

MS Advanced Computer Science | 09/2025

University of Sialkot | Sialkot, Pakistan

BS Software Engineering | 08/2022
