

HASNAT SHABBIR

+447555857820 | hasnat5124@gmail.com | London, UK

Summary

Backend-focused Software Engineer with **5 years of experience** building scalable APIs, cloud-deployed services, authentication systems, database-driven platforms, and SaaS backend workflows using **Node.js, TypeScript, Express.js, NestJS, AWS, Docker, MongoDB, PostgreSQL, and SQL**. Experienced with real-time systems, Socket.io/WebSockets, role-based access, query optimization, CI/CD, production troubleshooting, and backend integrations for high-volume web and mobile products.

Work Authorization: Full right to work in the UK (Graduate Visa valid until Feb-2028, no sponsorship required)

Skills

Backend: Node.js, TypeScript, Express.js, NestJS, REST APIs, GraphQL APIs, Socket.io, WebSockets, microservices, event-driven architecture

Databases: MongoDB, PostgreSQL, SQL, Mongoose, Sequelize, query optimization, data modelling

Cloud & DevOps: AWS, Elastic Beanstalk, EC2, S3, Lambda, Route 53, Docker, Docker Compose, CI/CD, AWS CodePipeline

Security & API Quality: JWT, OAuth 2.0, role-based access control, API security, Swagger/OpenAPI, debugging, production support

Secondary: React, Next.js, React Native, .NET API integration, SQL Server

Experience

CabDespatch LTD | Kent, England

Software Engineer | 08/2024 - Present

- Support backend APIs and database-driven taxi booking workflows across SaaS dispatch systems used by operator, customer, and driver applications.
- Integrate React and React Native clients with .NET backend APIs, SQL Server-backed services, ride booking flows, dispatch logic, and real-time operational updates.
- Contribute to multi-tenant SaaS architecture including client-specific configuration, zone-based access, booking rules, and reliable production behavior.
- Work on real-time socket/SignalR-style messaging for ride status synchronization, dispatch coordination, and live transport workflows.
- Manage Docker-based releases, AWS Elastic Beanstalk deployments, CI/CD pipelines, domain configuration, and production troubleshooting.

Fabulous Technology Solutions | Sialkot, Pakistan

Software Engineer | 02/2022 - 08/2024

- Built backend services using Node.js, Express.js, JavaScript, TypeScript, MongoDB, PostgreSQL, REST APIs, and authentication workflows.
- Improved API performance and maintainability through query optimization, cleaner service design, reusable backend patterns, and secure access control.
- Implemented integrations, role-based workflows, API documentation, and database-driven product features for production applications.
- Supported AWS and Docker deployments including Elastic Beanstalk, Amplify, containerized applications, and release troubleshooting.
- Promoted to Team Lead in 2024, supporting 10 developers with delivery planning, code review, and backend implementation quality.

Logics Yard | Lahore, Pakistan

Associate Software Engineer | 07/2021 - 02/2022

- Assisted with Node.js and Express.js backend development, REST API integration, server-side logic, and application debugging.
- Collaborated with frontend developers to connect React interfaces with backend services and maintain reliable application behavior.

Projects

GPHTEST / Glacier Peak Holistics Test Platform | Backend & Operations Platform

- Led backend workflows for a production platform managing 50k+ test processes, including registrations, barcode operations, sample tracking, report generation, and result delivery.
- Built Express.js/MongoDB services for role-based access, report regeneration, barcode exports, technician workflows, analytics aggregation, and operational reporting.
- Implemented PDF generation, CSV/PDF exports, duplicate detection support, and database-backed analytics for high-volume business operations.

Topics Chat | Real-Time Communication Backend

- Built scalable real-time messaging capabilities including 1-to-1 chat, group chats, community messaging, multimedia sharing, push notifications, and Socket.io/WebSocket workflows.
- Supported Agora audio/video integration and communication architecture for a startup platform with growth-focused product requirements.

Healthhop | Backend Integrations & Payments

- Developed backend functionality for a multi-role healthcare platform with provider, patient, and admin workflows.
- Integrated Stripe payments, escrow transaction workflows, Socket.io notifications, messaging-related workflows, and AWS/domain deployment support.

Education

University of Hertfordshire | Hatfield, England

MS Advanced Computer Science | 09/2025

University of Sialkot | Sialkot, Pakistan

BS Software Engineering | 08/2022
