

HASNAT SHABBIR

+447555857820 | hasnat5124@gmail.com | London, UK

Summary

Full Stack Developer with 5 years of experience building production business systems with a strong focus on **.NET backend APIs, C#, ASP.NET Core/Web API, SQL Server, LINQ, Entity Framework-style data access, SignalR, React, JavaScript/TypeScript, AWS, Docker, IIS, and Windows Server deployment**. Current UK experience is heavily focused on SaaS taxi dispatch systems, legacy and new .NET backend workflows, operator dashboards, SQL-backed booking logic, real-time dispatch messaging, and React interfaces, with lighter React Native mobile exposure.

Work Authorization: Full right to work in the UK (Graduate Visa valid until Feb-2028, no sponsorship required)

Skills

Backend: C#, .NET backend APIs, ASP.NET Core/Web API, SQL Server, LINQ queries, Entity Framework-style data access, REST APIs, authentication, authorization, legacy backend support

Database: SQL Server, relational data modelling, SQL queries, LINQ-to-database workflows, booking data, dispatch data, reporting workflows

Real-Time & Integration: SignalR, WebSockets, REST integrations, taxi dispatch messaging, ride status updates, API debugging, service-to-service workflows

Frontend: React, TypeScript, JavaScript, Next.js, Redux, HTML5, CSS, operator dashboards, responsive UI

Cloud & Deployment: AWS Elastic Beanstalk, Docker, CI/CD, domain configuration, Windows Server/IIS, Microsoft server deployment support

Secondary Exposure: React Native mobile API integration, Node.js/Express.js exposure, MongoDB, PostgreSQL

Experience

CabDespatch LTD | Kent, England

Software Engineer | 08/2024 - Present

- Develop and maintain .NET backend APIs and SQL Server-backed workflows for SaaS taxi booking, dispatch coordination, operator configuration, ride status, and production support.
- Work across legacy .NET backend projects and new backend systems, improving API behavior, booking logic, database access, and reliability for live taxi operators.
- Build and troubleshoot LINQ queries, SQL Server data access, authentication/authorization flows, and database-backed booking workflows for customer, driver, and operator journeys.
- Implement and support SignalR-based real-time messaging for taxi dispatch, ride status updates, driver communication, and live operational visibility.
- Deliver React operator dashboards integrated with .NET APIs for booking management, dispatch views, customer workflows, reporting, and administrative tools.
- Support AWS Elastic Beanstalk, Docker, CI/CD, domain configuration, Windows Server/IIS deployment, and Microsoft server-based backend releases.
- Maintain lighter React Native integrations where mobile apps consume .NET APIs for customer booking, driver jobs, and ride updates.

Fabulous Technology Solutions | Sialkot, Pakistan

Software Engineer | 02/2022 - 08/2024

- Built production React and Next.js applications using JavaScript, TypeScript, reusable components, dashboards, responsive UI, and API-integrated workflows.
- Developed React dashboards, data-driven screens, authentication flows, and reusable UI patterns for business platforms.
- Improved frontend maintainability through cleaner component structure, reusable patterns, and consistent implementation practices.
- Designed reusable components and patterns that reduced development effort by 50% across multiple projects.
- Promoted to Team Lead in 2024, supporting delivery, code review, and React implementation quality across a team of 10 developers.

Logics Yard | Lahore, Pakistan

Associate Software Engineer | 07/2021 - 02/2022

- Developed React components, responsive web pages, JavaScript UI features, and API-integrated screens for production web applications.
- Collaborated on debugging, troubleshooting, and code reviews to maintain reliable React application releases.

Projects

CabDespatch Taxi Systems | SaaS Dispatch, Booking & Mobile Platform

- Worked on taxi booking and dispatch workflows spanning .NET APIs, SQL Server-backed services, LINQ query work, SignalR real-time messaging, React dashboards, and deployment support.
- Supported legacy .NET backend maintenance and new system features including ride status updates, zone-based access, operator workflows, customer booking, driver job logic, and Windows Server/IIS release support.

CareFeedback | Web & Mobile Feedback Platform

- Developed web and mobile feedback workflows using location-aware automation, API-integrated screens, and real-time analytics dashboards.
- Built automated prompts triggered by geofencing activity to improve feedback timing, accuracy, and operational visibility.

Healthhop | Full-Stack Healthcare Platform

- Built multi-role dashboards and backend-connected workflows for providers, patients, and admins.
- Integrated Stripe payments, escrow transactions, real-time notifications, messaging workflows, and deployment/domain configuration.

GPHTEST / Glacier Peak Holistics Test Platform | Full-Stack Operations Platform

- Built React dashboards, backend workflows, role-based access, barcode/report operations, PDF delivery, analytics views, and high-volume operational reporting.

Education

University of Hertfordshire | Hatfield, England

MS Advanced Computer Science | 09/2025

University of Sialkot | Sialkot, Pakistan

BS Software Engineering | 08/2022
