

HASNAT SHABBIR

+447555857820 | hasnat5124@gmail.com | London, UK

Summary

React Native Software Engineer with **5 years of software development experience** specializing in cross-platform mobile applications, driver/customer apps, API-integrated mobile workflows, location-based features, payments, push notifications, real-time communication, and production mobile app support. Experienced with **React Native, JavaScript/TypeScript, REST APIs, .NET APIs, SQL Server-backed workflows, React, AWS, and Docker**.

Work Authorization: Full right to work in the UK (Graduate Visa valid until Feb-2028, no sponsorship required)

Skills

Mobile: React Native, Android/iOS, cross-platform development, mobile UI, driver/customer apps

Mobile Features: Maps/location, push notifications, payments, authentication, ride booking flows, driver job handling

API Integration: REST APIs, .NET APIs, Node.js APIs, JSON, error handling, real-time updates, Socket.io, SignalR

Frontend: React, JavaScript, TypeScript, Redux, responsive interfaces

Backend/Cloud Awareness: SQL Server, Node.js, AWS, Docker, CI/CD, production support

Experience

CabDespatch LTD | Kent, England

Software Engineer | 08/2024 - Present

- Develop and maintain React Native driver and customer mobile applications for SaaS-based taxi booking and dispatch platforms.
- Integrate mobile apps with .NET backend APIs and SQL Server-backed booking workflows for customer trips, driver jobs, ride status, and operator-managed dispatch.
- Build and support ride booking, driver job handling, customer trip flows, authentication, payment-related workflows, and production mobile app features.
- Implement real-time mobile updates using socket/SignalR-driven messaging for ride status, dispatch coordination, and live transport workflows.
- Work on mobile API debugging, release support, app reliability improvements, and integration with React operator dashboards and backend services.
- Support AWS, Docker, CI/CD, and deployment workflows that keep mobile-connected backend services stable in production.

Fabulous Technology Solutions | Sialkot, Pakistan

Software Engineer | 02/2022 - 08/2024

- Built web and mobile features using React Native, React, JavaScript, TypeScript, Node.js, Express.js, APIs, and database-backed workflows.
- Integrated mobile and frontend applications with APIs to deliver user-facing workflows, data-driven screens, real-time behavior, and communication features.
- Created reusable application components that improved consistency and reduced development effort across multiple projects.
- Worked on production debugging, API integration issues, app reliability, and maintainable delivery across mobile and web applications.
- Promoted to Team Lead in 2024, supporting feature delivery and implementation quality across a team of 10 developers.

Logics Yard | Lahore, Pakistan

Associate Software Engineer | 07/2021 - 02/2022

- Built React and JavaScript application components and integrated REST APIs for responsive user-facing workflows.
- Collaborated on debugging and troubleshooting across client and backend layers to improve application stability.

Projects

Topics Chat | Social Media Mobile Application

- Built a feature-rich social media app with personal, group, community, and channel messaging supporting text, audio, video, file sharing, polls, and push notifications.
- Integrated Agora SDK for audio/video calls, including paid interaction flows for celebrity-style experiences.
- Implemented engagement features including paid content, personalised home feed, background location tracking, profile picture carousel, verified badges, and username marketplace workflows.

CareFeedback | Geofencing Web & Mobile Feedback App

- Developed a geofencing-based feedback app that detects when users enter or exit client office locations and prompts timely feedback collection.
- Connected mobile automation workflows with real-time web dashboards so clients could review actionable feedback analytics and location-based insights.

Survey Builder | Custom Survey Web & Mobile App

- Built a customizable survey management platform for web and mobile users with 15+ question types, publishing workflows, and response analysis.
- Implemented survey creation, publishing, management, and analytics screens for admins and end users.

RollingAdz | Vehicle Advertising Campaign App

- Developed app workflows for vehicle-based ad campaigns where users select vehicles, enter campaign details, and launch advertising campaigns.
- Built driver, agency, and admin dashboard flows to manage campaign activity, vehicle information, and operational visibility.

iSentCare | Healthcare Staff & Shift Management App

- Built healthcare workforce workflows for monitoring shifts, staff logins, payroll calculations, attendance/activity tracking, and operational management.
- Supported role-based access for staff and administrators managing healthcare operations and shift-related data.

KDR App | Car Selling Marketplace

- Developed marketplace app workflows for car listings, vehicle details, user browsing, and seller/customer interactions similar to Autotrader-style platforms.
- Built mobile-friendly listing and vehicle information flows with API-connected data handling and user-facing screens.

CabDespatch Driver & Customer Apps | Taxi Booking & Dispatch Mobile Workflows

- Built and supported mobile workflows for customer booking, driver job handling, ride updates, dispatch coordination, authentication, and API-connected production features.
- Integrated React Native apps with .NET APIs, SQL Server-backed services, socket/SignalR messaging, and deployment-supported backend systems.

Healthhop | Mobile-Connected Healthcare Workflows

- Supported API-connected healthcare workflows with real-time notifications, messaging, payment integration, role-based dashboards, and multi-platform setup.

Education

University of Hertfordshire | Hatfield, England

MS Advanced Computer Science | 09/2025

University of Sialkot | Sialkot, Pakistan

BS Software Engineering | 08/2022
