

HASNAT SHABBIR

+447555857820 | hasnat5124@gmail.com | London, UK

Summary

Results-driven **Software Engineer** with **5 years of experience** building **scalable web and mobile applications** with **JavaScript technologies**, including **React, Next.js, Node.js, Express.js, NestJS, and React Native**. Experienced in developing cloud-based and containerized systems using **AWS** and **Docker**, with a strong focus on API design, real-time features, multi-tenant platforms, and maintainable full-stack architecture. Contributed to production systems that support complex data workflows, analytics, integrations, and role-based platforms. Recognized for clean code, technical ownership, cross-functional collaboration, and team leadership. Full right to work in the UK; **no sponsorship required**.

Skills

Frontend: React, Next.js, React Native, JavaScript (ES6+), TypeScript, HTML5, CSS, Redux, Bootstrap

Backend: Node.js, Express.js, NestJS, REST APIs, GraphQL APIs, Socket.io, JWT, OAuth 2.0, Microservices, Event-Driven Architecture, Redis, Job Scheduling, Serverless System Design

Databases: MongoDB, PostgreSQL, SQL, Mongoose, Sequelize

Cloud & DevOps: AWS, Elastic Beanstalk, EC2, S3, Lambda, Route 53, Docker, Docker Compose, CI/CD Pipelines, AWS CodePipeline, Serverless Deployments

Additional: API Integration, WebSockets, Swagger, OpenAPI, Git, Debugging, Troubleshooting, Cross-Platform Mobile Development, Agile Collaboration

Experience

Software Engineer | CabDespatch LTD | Kent, England | 08/2024 - Present

- Develop and maintain SaaS ride-booking applications for taxi operators using React Native, React.js, .NET APIs, and SQL Server.
- Build customer and driver mobile apps, operator dashboards, and backend features supporting booking and dispatch workflows.
- Implemented multi-tenant architecture with zone-based access to support multiple clients on a shared platform.
- Managed Docker containerization, CI/CD pipelines, and domain configuration for reliable deployments and updates.
- Deployed frontend and backend services on AWS Elastic Beanstalk with automated build and release workflows.
- Supported platform reliability, scalability, and maintainability through cloud infrastructure management and monitoring.
- Collaborated with cross-functional teams to deliver production-grade features with strong focus on performance and user experience.

Software Engineer | Fabulous Technology Solutions | Sialkot, Pakistan | 02/2022 - 08/2024

- Worked as a Full-Stack Developer across frontend and backend systems using modern JavaScript technologies.
- Improved backend performance through query optimization, scalable API design, and security best practices.
- Built clean, reusable components and services to improve maintainability across multiple projects.
- Designed reusable software components that reduced development effort by 50% across projects.
- Expanded into DevOps responsibilities, deploying full-stack applications on AWS using Docker, Elastic Beanstalk, and Amplify.
- Contributed to cloud-based application delivery and deployment automation in production environments.
- Earned highest performance rating in the past year and was promoted to Team Lead in 2024.
- Led a team of 10 developers, supporting delivery, collaboration, and engineering best practices.

Associate Software Engineer | Logics Yard | Lahore, Pakistan | 07/2021 - 02/2022

- Developed responsive front-end components using HTML, CSS, JavaScript, and React.
- Assisted with backend development using Node.js and Express.js for server-side logic and API integration.
- Integrated RESTful APIs to connect frontend interfaces with backend services.
- Collaborated on debugging and troubleshooting across the stack to improve application stability.

- Participated in code reviews to maintain code quality and development standards.

Projects

Topics Chat | Social Media & Communication Platform | 11/2023 - 08/2024

- Architected and developed the foundational codebase for a funded social media startup.
- Built scalable real-time messaging features including 1-to-1 chat, group chat, community messaging, multimedia sharing, and push notifications.
- Integrated Agora SDK for audio and video calling, including early premium interaction logic.
- Developed core platform capabilities such as background location tracking, personalized feed logic, and a username marketplace.
- Contributed to early-stage technical architecture to support future product growth.

GPHTEST / Glacier Peak Holistics Test Platform | Full-Stack Web Application

- Led development of a production testing platform managing 50k+ workflows across registrations, barcode operations, sample tracking, technician reports, and result delivery.
- Built multi-role dashboards for admins, sub-admins, technicians, and customers.
- Engineered automated report generation workflows with scoring logic, recommendations, PDF delivery, and exportable data.
- Developed analytics dashboards covering workflow status, activation trends, geographic distribution, duplicate clients, demographics, and reporting insights.
- Supported high-volume operational processes by automating business-critical workflows and reducing manual effort.
- **Tech Stack:** React, Material UI, Node.js, Express.js, MongoDB, Mongoose, PDF generation, CSV/PDF exports, role-based authentication, analytics aggregation, cloud deployment

CareFeedback | Web & Mobile Feedback Platform

- Developed an intelligent feedback platform using geofencing to detect user entry and exit at client office locations.
- Built automated feedback prompts triggered by location activity to improve timing and accuracy of customer feedback collection.
- Created real-time analytics dashboards to help clients monitor trends and generate actionable insights.
- Implemented location-based automation workflows to reduce manual data collection and improve operational visibility.

Healthhop | Full-Stack Medical Platform

- Developed a multi-role healthcare platform supporting providers, patients, and admins through dedicated web dashboards.
- Integrated Stripe payments and escrow workflows for secure medical procedure transactions.
- Implemented real-time notifications and messaging using Socket.io across email, phone, and WhatsApp workflows.
- Built React dashboards and supported integration with the main WordPress website.
- Configured multi-domain forwarding and deployment workflows using AWS and GoDaddy.

Education

MS Advance Computer Science | University of Hertfordshire | Hatfield, England | 09/2025

BS Software Engineering | University of Sialkot | Sialkot | 08/2022
